

Way down, performed by Elvis Presley	
key: C	
C]	F
Babe, you're getting closer	The medicine within me
The lights are goin' dim	No doctor could prescribe
	C
The sound of your breathin'	Your love is doing something
	G C
Has made the mood I'm in	That I just can't describe
F	
All of my resistance	G
	Ooh, and I can feel it,
Is lying on the floor	
C	Feel it, feel it, feel it
You're sending me to places	C
G C	Way down where the music plays
I've never been before	G
	Way down like a tidal wave
G	
Ooh, and I can feel it,	Way down where the fires blaze
	F C F C
Feel it, feel it, feel it	Way down, down, way, way on down
C	Hold me again,
Way down where the music plays	
G	Tight as you can
Way down like a tidal wave	
	I need you so,
Way down where the fires blaze	
F C F C	Baby, let's go
Way down, down, way, way on down	
	G C
Ooh, my head is spinnin'	Way down where it feels so good
	G
You got me in your spell,	Way down where I hoped it would
A hundred magic fingers	Way down where I never could
	F C F C
On a whirling carousel	Way down, down, way, way on down
